## PROFESSIONAL OBJECTIVE

Junior–Mid Software Developer focused on problem-solving: I'm driven by understanding systems, designing solutions, and learning across domains. I'm looking to contribute to projects with real challenges: analyzing problems, prototyping, measuring, and improving. I'm adaptable across backend, data, tooling, or frontend. I seek a team with good engineering practices to grow and deliver value. Open to on-site positions, full-time availability, and relocation. Fluent in English and native Spanish speaker.

---

## PROFESSIONAL EXPERIENCE

- Software/Web Developer
  - Optare Solutions
  - Freelance Development

---

## OTHER ACHIEVEMENTS

- Co-Founder of Queater: AI-powered software startup focused on restaurant optimization, offering an all-in-one platform for POS management, inventory control, and dynamic menu creation.

---

## EDUCATION

- Advanced Vocational Degree in Web Development
- Master's Degree in Artificial Intelligence and Big Data
- English Level: B2 (Fluent in conversation)

---
